# Experiment 5: Wireframe for a Mobile Application with Localization Features

## Aim

To design a wireframe using Figma for a mobile application that incorporates localization features.

## Procedure

1. Open Figma.
2. Create a new file.
3. Select the Frames.
4. Fill in the content required for the presentation.
5. Design the visual elements.
6. Make it interactive.
7. Add annotations and explanations.
8. Incorporate multimedia.
9. Create the storyboard animation.
10. Review and edit the prototype.
11. Save and share.

## Design and Prototype

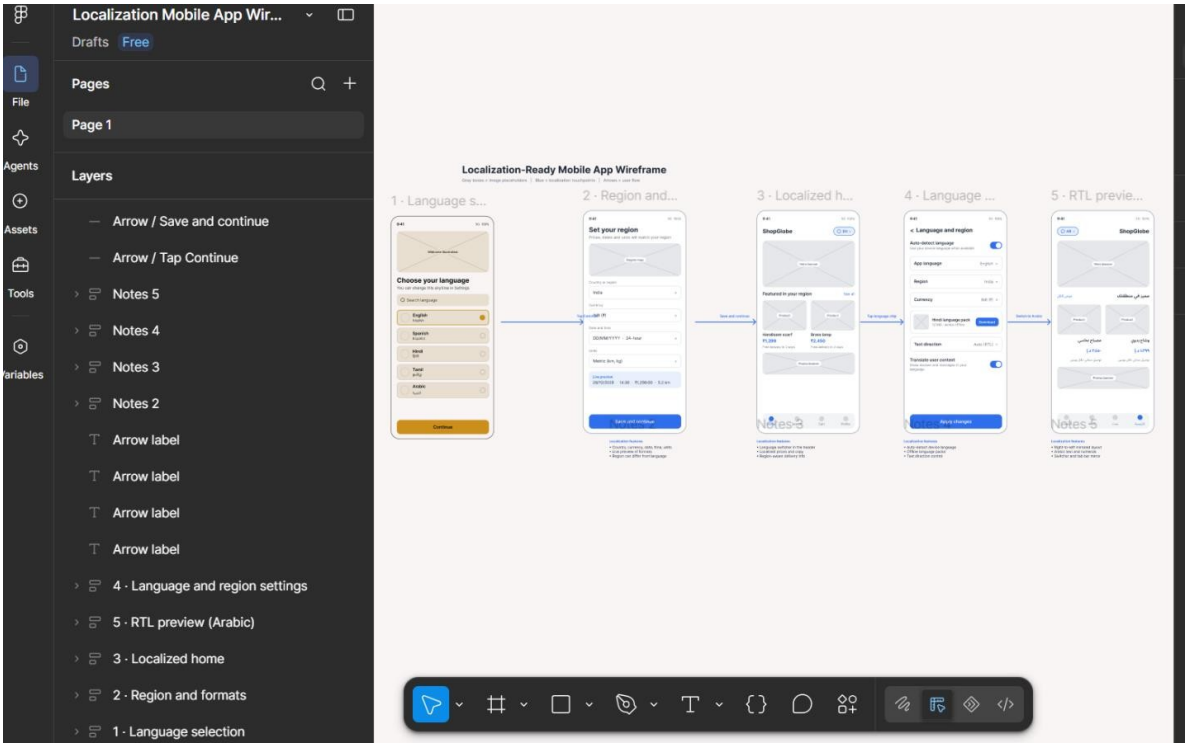

*Fig. 5.1 Localization-ready mobile app wireframe and prototype flow*

## Result

Hence, the wireframe for a mobile application that incorporates localization features using Figma has been created and executed successfully.
